

LogoDog

Supreme logo generation

LogoDog is the most user friendly, user programmable logo generator available for the insertion of **static or animated logos and text**, of any size, from small 'bug' styles, right up to full screen versions.

It can import almost any graphic image format, so design of logos can easily be achieved using freely available design packages. A key file can also be imported allowing Logos to be displayed with any level of transparency and/or softness. LogoDog can be used upstream or downstream as it includes its own internal keyer in addition to offering a key signal output. It can also be installed on a network and profiles can be called up as required.

FEATURES

- Any size logo from small bug style up to full screen
- Integral character generator allows addition of text fields
- Import images in almost any graphic format
- Uses internal hard disk for image, & profile storage
- Includes CD & floppy for archive purposes
- Vast number of different logo's can be stored on the hard disk
- Selectable upstream or downstream modes
- Remote control via panel, virtual panel & automation systems
- Network capability
- GPI inputs for simple control
- Cut or Fade logo in/out
- Select from number of logos
- Serial Digital video input and output
- Power fail bypass

Input of excellence, output of quality

SPECIFICATION

Inputs

Power: 220 Volts 50Hz
110Volts 60Hz

Reference Serial Digital

Video

Serial Digital
1 program I/P, relay bypass protected

Keyboard PS/2

Mouse PS/2

Monitor VGA (50/60Hz)

Serial RS 232(RS422 Option)

Network 10/100 base T

GPI

Outputs

Video:

Serial Digital

Full bypass of VITS,VITC, embedded audio,etc
SDI (4:2:2) 10 bit 2 Program outputs. Automatic
EDH. 270 Mb/s

Linear Key

Internal Keyer: 10 bit linear

Mechanical – Rack Electronics

Height: 2U
Depth: 425mm
Weight: 10kg

Ordering Information

Code	Description
CY530	LogoDog

CY530/02	SDI I/O
----------	---------

CY530/03	N/A
----------	-----

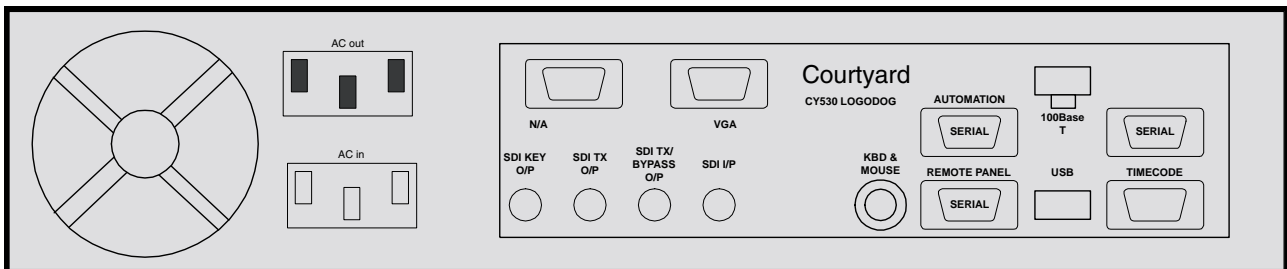

CY530/04	N/A
----------	-----

CY530/08	1U Control Panel
----------	------------------

CY530/09	Automation Software
----------	---------------------

NB : Each LogoDog is supplied with a keyboard, mouse, handbook and mating connectors where appropriate.
