

Don't want to be caught generating illegal signals?

Highly saturated colours can cause transmitters to overload and shut down. Before you break the "Gamut Law" call in the

SHERIFF

It uses advanced technology to eliminate gamut errors or illegal colours.

Don't risk being rejected because of illegal colours. Let Sheriff do the work for you:

- Makes your colours legal without changing the hue.
- Ensures your saturation is within legal limits for analogue transmission.
- Monitors and displays any illegal colours on a pixel by pixel basis.
- Has programmable tolerance bands that meet all your requirements in RGB/YCrCb.
- Serial Digital I/O and composite monitor output.
